

STD Accomplishments

In the 15 year duration of the Drum Point Special Tax District, we have:

Repaired and improved or replaced all five Causeways, conserving their function as dams and roadways (this includes partial FEMA funding for the Bay Drive Causeway);

Brought all 15.3 miles of roads to acceptable standards, with asphalt on firm bases, and the use of the Rejuvenation system to conserve asphalt surfaces;

Engaged professional employees to manage and coordinate DPPOA and STD work, as planned in all STDs, as well as to coordinate budgets/accounting;

Upgraded street signs;

Rebuilt the community boat ramp;

Inspected and cleared or repaired several hundred under-road pipes;

Improved accessibility for emergency vehicles and school buses;

Established a Community office with centralized archives and records, and implemented up-to-date IT capability for records, e-mail, fax and internet, thus enabling DPPOA to maintain modern communications with the Community, the Calvert County government and all contractors and others with whom the DPPOA interacts.

In addition, during the last 14 years, DPPOA has always had sufficient funds to be able to keep its own roads cleared of snow and fallen trees in a timely manner after severe weather events.
